

PTCS

Proton Therapy Center Switzerland AG

12 Are any co-operations being planned?

It is intended to seek collaboration with both, the Paul Scherrer Institute (PSI) in Villigen, Canton of Aargau and with all Swiss radiation therapy providers. First discussions took place on March 4th, 2008 with the responsible persons at PSI, who are very interested in a scientific cooperation with the PTC nearby the Lake of Lucerne in the Canton of Schwyz and have declared their willingness for cooperation.

At the same time, we had larger discussions with USZ (University Hospital of Zürich) for a cooperation.
